

RMSA Web Site

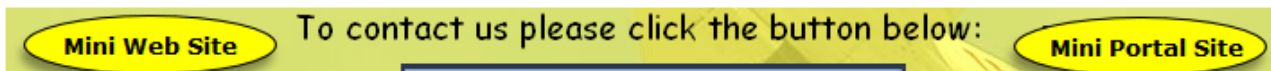

Mini Web Site and Mini Portal Site - Help Page

Overview: Hover mouse over page objects to reveal roll-over images and help tips

Two mini sites have been added to the RMSA Website Home Zone page which can be used either in conjunction with the main web site, or alternatively, as stand alone sites. Each site contains five direct links to member information plus this help page – and are sub-sets of the main site (i.e. all information is available on the main site).

The mini sites can be used for simpler and more direct access to content as well as providing performance improvements for users with dial-up connections, slow broadband, 3G dongle connections or mobile devices e.g. WiFi or 3G enabled.

To access the mini sites, click on the yellow oval buttons on the main site Home Zone page (www.baermsa.org.uk) as shown below:

Alternatively, the mini sites can be used independently by clicking on the links below:

Mini Web Site: <http://www.baermsa.org.uk/RMSA%20Mini%20Web%20Site/index.html>

Mini Portal Site: <http://www.baermsa.org.uk/RMSA%20Mini%20Portal%20Site/index.html>

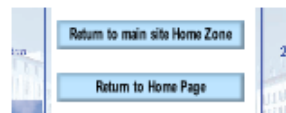

Hint: For even faster access set up desktop short cuts for the links above.

Using the Mini Sites:

The Mini Web Site has links to six on-site content pages, whilst the Mini Portal Site has links to six off-site content web pages, all the pages/links are accessed by clicking the buttons on the respective home pages as shown here:

On Mini Web Site pages, there are buttons to return to the local home page or to the main site Home Zone page as shown here:

A navigation Bar is also provided at the bottom of each page.

Similarly, the Mini Portal Site has a button to return to the main site Home Zone page – all the content opens in new browser windows – just close these pages to return to the portal site.

You can switch between Mini Web and Portal Sites by clicking on the right hand side yellow oval button and you can return to the Main RMSA site by clicking on the left hand side yellow oval button.
